INTERNSHIP REPORT PRESENTATION

Community Teaching & Social Outreach Programme

STUDENT NAME

Nikhil Godara

ENROLLMENT NUMBER

25SCS1003001683

PROGRAM & SEMESTER

B.Tech CSE — 3rd Semester

ORGANIZATION

Mahila SewaShakti Foundation

Introduction

This report presents a detailed account of the social internship undertaken with Mahila SewaShakti Foundation, as part of the requirement of the Bachelor of Technology (Computer Science and Engineering) programme at IILM University, Greater Noida.

Unlike a conventional technical internship, this was a group social internship in which the team was given the responsibility of teaching students of Classes 1st, 3rd and 5th at the foundation's centre.

Sessions ran weekly, two hours each, every Monday for a month — strengthening students' academic foundation in Mathematics and language skills, while building the intern's own communication, patience, teamwork and social responsibility.

Organization Profile

Mahila SewaShakti Foundation

A non-governmental organization (NGO) working towards the welfare, empowerment and education of underprivileged communities — with a special focus on women and children.

Runs a learning centre offering additional academic support to students from nearby areas who lack access to consistent, quality schooling.

1

Focus on women and children from economically weaker backgrounds

2

Provides remedial academic support beyond regular schooling

3

Depends on student volunteers and interns for teaching support

4

Aims to bridge learning gaps and mentor children toward better outcomes

Problem Statement

A large number of children studying at the foundation's centre come from economically weaker backgrounds and do not always have access to consistent schooling, guidance, or academic support at home.

As a result, many students lag behind the learning level expected for their class.

The internship was designed to address this gap by providing focused, small-group remedial teaching to students of Classes 1st, 3rd and 5th, and to help identify and support the students who were struggling the most.

Objectives of the Internship

- 1 Conduct engaging and effective teaching sessions for students of Classes 1st, 3rd and 5th
- 2 Assess the existing academic level of each student and identify learning gaps
- 3 Help students improve their basic reading, writing and mathematical skills
- 4 Build confidence among students and encourage active participation in class
- 5 Work collaboratively as a group of interns under the guidance of the NGO mentor
- 6 Develop soft skills — patience, communication, empathy and responsibility

Scope of the Internship

The scope of this internship was limited to conducting in-person teaching sessions at the Mahila SewaShakti Foundation centre — tailored to each student's individual learning level rather than a fixed classroom curriculum.

Once every week, on Mondays

Two hours per session

Spread across one month

Mathematics: counting, tables, multiplication & division

Language & reading skills

On-ground remedial teaching session

Teaching Methodology & Activities

1

Quick Assessment

Each session began by reviewing what students remembered from the previous week.

2

Focused Teaching

Whiteboard-based instruction, one-on-one doubt clearing and small group activities.

3

Divide & Support

Interns split across smaller groups by class and learning level so no child was left behind.

4

Active Practice

Students solved problems on the board themselves, building confidence and understanding.

Topics covered: number counting · multiplication tables · division word problems · handwriting · reading practice

Observations

Wide Variation in Level

Even within the same class, ability ranged widely — some students were exceptionally quick to grasp new concepts, while some in Class 5th were still unfamiliar with basic Class 1st level counting and reading.

Patience Made a Difference

This gap highlighted the real, on-ground challenges faced by underprivileged students, underscoring the importance of individualized attention. Shy students gradually became more comfortable and participative — patience and consistent encouragement made a visible difference.

Session-wise Schedule

Session	Class Group	Focus Area / Activity
Session 1 (Week 1)	Class III — Remedial	Assessment of existing reading, writing and number skills; basic counting and place value (1000–1500 range counting).
Session 2 (Week 2)	Class III & V — Combined Remedial	Mental maths practice (multiplication and division problems), Hindi reading.
Session 3 (Week 3)	Class I, III & V — Group Teaching	Table learning (14–19 tables), basic division and multiplication word problems, handwriting practice.
Session 4 (Week 4)	Class I, III & V — Review & Consolidation	Recap of topics covered, one-on-one doubt clearing, encouraging weaker students, small oral tests.

Learning Outcomes

- Gained practical, hands-on experience in teaching and mentoring children from underprivileged backgrounds
- Learned how to identify and adapt to different learning levels within the same group of students
- Developed patience, empathy and effective communication skills through direct interaction
- Understood the value of teamwork by coordinating with fellow interns to manage a diverse group
- Experienced a strong sense of satisfaction and personal fulfilment through teaching

“Even over a short span of a month, our efforts could make a small but meaningful difference in the lives of these students.”

Conclusion

This social internship with Mahila SewaShakti Foundation was a truly enriching and eye-opening experience. Working as a group to teach students of Classes 1st, 3rd and 5th allowed us to step outside the conventional technical scope of our degree and contribute meaningfully to society.

It taught us that education is not just about delivering a fixed curriculum, but about understanding each student's individual needs and helping them grow at their own pace.

GRATITUDE

Thankful to Ms. Sarita, mentor at the NGO, for her constant guidance and support; to Mahila SewaShakti Foundation for the opportunity; and to IILM University for its continuous encouragement throughout the internship.

Thank You
